

Let's build on our community's strengths and take action together.

There are challenges ahead –

- Infrastructure and maintenance
- Housing
- Work so that members can support their families
- Climate change and its impact on our food security and natural resources
- Community safety that reflects Indigenous values

As a councillor, I will bring thoughtful leadership to the council table that will restore our community's confidence in our ability to manage change through **real action, progress and community partnership.**
